FOR 1909 - 1910

ANNOUNCEMENT

FOR 1910 - 1911

FAYETTE, MO.
PRINTED FOR THE COLLEGE
1910

CALENDAR

1910

- JUNE 5 *Sunday*. Baccalaureate sermon by Rev.
Hoyt M. Dobbs, Kansas City,
Mo.
- JUNE 6 *Monday*, 4 P. M. Meeting of Board of Curators.
8 P. M. Contest for William A. Smith
prize in oratory.
- JUNE 7 *Tuesday*, 8:30 A. M. Meeting of Board of Curators.
3:30 P. M. Academy Declamation contest.
8:00 P. M. Alumni address by Rev. C. M.
Aker, A. B., 1903, Columbia,
Mo.
- JUNE 8 *Wednesday*, 10 A. M. Commencement exercises. Com-
mencement address before the
literary societies by Victor C.
Vaughan. M. D., Dean of
Medical Department, Univer-
sity of Michigan, Ann Arbor,
Mich.

Summer Vacation

- SEPTEMBER 14. *Wednesday*. First semester begins.
- SEPTEMBER 14, 15. Matriculation, registration, and
examination of students.
- SEPTEMBER 16. *Friday*. Instruction begins in all depart-
ments.
- OCTOBER 14 *Friday*. Benefactors' day.
- NOVEMBER 24. *Thursday*. Thanksgiving day.
- DECEMBER 22. *Thursday*, 4:30 P. M. Christmas recess begins.

1911

- JANUARY 3 *Tuesday*, 8 A. M. Recitations resumed.
- FEBRUARY 4 *Saturday*. Midyear examinations close.
- FEBRUARY 7 *Tuesday*. Second semester begins.
- FEBRUARY 13 *Monday*. Valentine's Day Concert.
- FEBRUARY 22. *Wednesday* Washington's birthday.
- APRIL 3 *Monday*. Inter-Society declamation con-
test.
- APRIL 13 *Thursday*, 4:30 P. M. Easter vacation begins.
- APRIL 18 *Tuesday*, 8:00 A. M. Recitations resumed.
- MAY 1 *Monday*. Anniversary Phi Alpha Society.
- MAY 13 *Saturday*. Prize essays and orations due.
- MAY 15 *Monday*. Anniversary of Aristotelian
Society.
- MAY 30 *Tuesday*. Final examinations begin.
- JUNE 11-14 Commencement exercises.

BOARD OF CURATORS

JUDGE JOHN A. RICH, *Chairman*
 SAMUEL CUPPLES, *Vice Chairman*

FACULTY

WILLIAM A. WEBB, President and Professor of English.

A. B., Vanderbilt University, 1891; Teaching Fellow, 1891-92; Assistant Teacher, Webb School, 1892-95; Graduate Student, University of Leipzig, 1895-97; Principal Central Academy, 1897-99; Graduate Student, University of Berlin, 1903-04. Professor of English, Central College, since 1899. President since 1907.

Chair endowed in honor of Mary Evans Barnes.

T. BERRY SMITH, Professor of Chemistry and Physics.

A. B., Pritchett College, 1873; A. M., 1879; Graduate Student in Chemistry, Yale University, 1875-76, and at University of Chicago, Summer, 1908. Instructor in Natural Sciences, Pritchett College, 1873-75; Professor of Chemistry and Physics, 1876-77; Professor of Chemistry, Geology, and Latin, State Normal, Kirksville, Mo., 1877-78; Professor of Greek and Latin, Pritchett College, 1878-79; Professor of Chemistry, Physics, and Mineralogy, Carleton College, Minn., 1879-80; Professor in McCune College, 1880-82; Professor of Natural Sciences, Pritchett College, 1882-86; Professor of Chemistry and Physics, Central College, since 1886; Acting President, 1901-03.

Chair endowed in honor of Richard M. Scruggs.

REV. RICHARD THOMPSON BOND, Professor of Mathematics and Astronomy.

A. M., Pritchett College, 1872. Teacher in Missouri, California, and Oregon, 1855-66; Assistant in Pritchett College, 1867-73; Professor of Mathematics, Washington University, 1873-77; President of Pritchett College and Professor of Mathematics, 1877-86; Professor of Mathematics and Astronomy, Central College, since 1886.

JOHN L. HOUSE, Professor of Biology and Geology.

Graduate of Indiana State Normal, 1899; A. B., Indiana University, 1903; Graduate Student, Indiana University, Summer Sessions 1903 and 1907; Assistant in Indiana University Biological Station, Winona Lake, Ind., Summer, 1908-1909; Superintendent of Schools, Knox County, Ind., 1897-98; Principal of High School, Monrovia, Ind., 1899-1902; Superintendent of Schools, Wheatland, Ind., 1902-04; Professor of Science, State Normal School, Springfield, S. Dak., 1904-05; Professor of Biology and Geology, Central College, since 1905.

Chair endowed by George T. Hoagland.

W. WALLACE CARSON, Acting Professor of History and Assistant Professor of English.

A. B., Wofford College, 1907; A. M., Trinity College, 1908; Assistant in English, Trinity College, 1907-08; Graduate Student, Columbia University, Summer Session, 1909; Acting Professor of History and Assistant Professor of English in Central College, 1908-10.

J. REESE LIN, Professor of Philosophy and Education.

A. B., Emory College, 1887; Superintendent Lumpkin, Ga., Schools, and Principal Villa Rica, Ga., High School until 1894; Fellow in Vanderbilt University, 1894-1896; M. A., Vanderbilt University, 1896; Superintendent Wesson, Miss., Schools until 1901; Instructor in University of Mississippi Summer School, 1902-1905; Superintendent Natchez, Miss., Schools, 1901-1907; Superintendent Alexandria, La., Schools, 1907-1909; Student in Columbia University, 1908 (Summer School); Instructor in Psychology in Tulane University (Summer Term), 1909; Professor of Philosophy and Education, Central College since 1909.

GOTTLOB C. CAST, Associate Professor of Modern Languages.

Ph. B., Central Wesleyan College, 1907; A. M., Northwestern University, 1908; Graduate Student, Chicago University, Summer, 1909; Instructor in German, Grinnell Academy, 1908-1909; Associate Professor of Modern Languages, Central College, since 1909.

SAMUEL A. JEFFERS, Professor of Greek and Latin.

A. B., Central Wesleyan College, 1892; A. M., 1894; A. M., University of Michigan, 1897; Ph. D., 1900; Assistant in Latin, University of Michigan, 1897-99; Professor of Greek and Latin, Central University of Kentucky, 1900-1901; Professor of Latin, State Normal School, California, Pa., 1902-1908; Graduate Student American School of Classical Studies, Rome, Italy, 1904-1905; Professor of Latin, High School, Wilksburg, Pa., 1908-1909; Professor of Greek and Latin in Central College since 1909.

Chair endowed by Robert A. Barnes.

ERASTUS PAUL PUCKETT, Principal of Central Academy, Professor of History and Economics, *elect.*

A. B., Howard College, 1903; M. A., Tulane University, 1907; Assistant Principal, Scottsboro Baptist Institute, Scottsboro, Ala., 1903-05; Graduate Student, Tulane University, 1905-08; Fellow in History, Tulane University, 1906-08; Principal of Central Academy 1908-1910.

JOHN C. GODBEY, Principal of Central Academy, *elect.*

A. B., Central College, 1904; A. M., 1905; Principal of New Haven School, 1905-06; Principal of Paris Public School, 1906-08; Graduate Student and Fellow, Vanderbilt University, 1908-10; Assistant in English, 1909-10.

IRBY ROLAND HUDSON.

A. B., Vanderbilt University, 1906; Assistant in North Texas University School, Terrell, Texas, 1906-08; Assistant in Central Academy since 1908.

RAY H. KIRK.

A. B., Central College, 1908; B. S., 1909; Assistant in Central Academy since 1909.

JOHN C. GODBEY, Director of Gymnasium.

FRANCIS L. HOCKETT, Assistant Librarian in Central College since 1908.

CENTRAL COLLEGE

Historical Statement

On the first day of March, 1855, the legislature of Missouri approved the following act:

WHEREAS, The members of the Methodist Episcopal Church, South, in this State, at a convention of delegates held in St. Louis on the thirteenth of April, 1853, resolved to unite the means and efforts of their Church in the erection of one college of the highest order, at Fayette, in this State, and adopted the plan for that purpose; and, whereas, the two Conferences of the Church, pursuant to that plan, appointed a Board of Curators, composed of the following persons, appointed by the St. Louis Conference, that is to say: J. S. Waddell, Silas Silver, Charles W. Stewart, Edward J. Gay, Henry R. Walker, W. Adams, Esq., Dr. William Price, Rev. D. R. McAnally, J. K. Lacy, Thomas Johnson, N. Scarritt, J. Boyle, D. D., J. F. Truslow, J. T. Peery and James Mitchell; and of the following persons appointed by the Missouri Conference, that is to say: W. D. Swinney, Jo. Davis, C. C. P. Hill, Abiel Leonard, G. M. B. Maughs, M. D., Alexander Mitchell, John B. Clark, Rev. A. Monroe, R. P. Holt, William B. Watts, B. H. Spencer, P. M. Pinckard, J. F. Riggs, R. G. Loving and W. G. Caples; and, whereas, a quorum of these gentlemen met at Fayette on the ninth day of December, 1854, and appointed the following officers: J. Boyle, D. D., President; C. C. P. Hill, Vice-President; William T. Lucky, Secretary, and Adam Hendrix, Treasurer, and adopted such other measures in furtherance of the design as they deemed proper, and have procured a large sum of money to be subscribed, payable to Adam Hendrix, their Treasurer, and now desire an act incorporating the proposed institution; therefore,

Be it enacted by the General Assembly of the State of Missouri, as follows:

SECTION 1. The above mentioned persons, and their successors in office, are hereby constituted a body politic, with all the rights, powers and privileges usually enjoyed by colleges and universities of the highest grade, or which may be necessary and proper to enable them to promote the cause of learning in the State; and all acts of the Board of Curators aforesaid, in furtherance of the object of their appointment by the two Conferences, are hereby ratified and confirmed.

Under this charter, Central College was organized in Fayette, Howard County, Missouri, in the year 1857. In 1901, the three conferences of the Methodist Episcopal Church, South, in Missouri, concurrently approving such action, the necessary legal steps were taken to secure amendments to the charter. These provided as follows:

"The number of the Curators of this corporation shall be twenty-four, and one-third of the whole number of such Curators shall be appointed by each of the three conferences of the Methodist Episcopal Church, South, in Missouri—that is to say, the St. Louis Conference, the Missouri Conference, and the Southwest Missouri Conference of said Church.

"The term of office of each Curator hereafter appointed shall be four years and until his successor is appointed and qualified.

"One-third of the Curators hereafter appointed by each of said conferences shall be Alumni of Central College, and each Curator who is appointed as a representative of the Alumni of the College shall be selected by the conference appointing him from not less than three persons who shall have been nominated for that purpose by the Alumni of Central College to such conference."

Purpose of the Institution

The purpose which the founders of Central College had in view was to afford to the young men and women under the direction of the Church an education which should be distinctively Christian. They did not propose to teach any system of theology, or to undertake the work of a theological seminary. The management of the College interprets Christianity from an evangelical standpoint, but its effort is to make its students cultured Christian men and women rather than Methodists.

We hold that if Christianity be what the Church believes it to be, its claims, its contents, and the grounds for believing it should form a part of the college curriculum, and our work is directed to the end that our students shall be trained religiously as well as intellectually during their college course. The

course has been chosen with this in mind, and the instructors are selected with this fully in view.

We recognize the religious element as necessary to true education. Learning which is merely secular cannot secure the highest and the best life for the individual, for society, or for the state. The Church is obliged by every consideration to do something more than merely to educate her children; she must afford education which is distinctively Christian. And the parents or guardians are under corresponding obligation to secure this element of instruction and influence for those under their care.

Endowment

The present productive endowment of the College is securely invested and interest-bearing. It is most desirable to increase this amount at an early day to not less than \$500,000, and the Board of Curators is now organizing its efforts to complete this endowment at the earliest possible date. The large facilities of many of the older colleges are due to the timely liberality of their friends. Some generous friends of Central College have already signified their purpose of making testamentary bequests to the College. To guide any who may not know the legal style of the College, the following form has been carefully prepared:

FORM OF BEQUEST

And I further will, devise, and bequeath unto the Curators of the Central College, located in the town of Fayette, in the county of Howard, in the State of Missouri, the sum of..... Dollars, to be used and devoted by the Curators of said College for its sole use and benefit and in such manner as said Curators may in their discretion provide, to have and to hold the said sum for said purpose alone to said College forever.

Buildings

Central College has a charming campus of twenty-five acres, on which are located six of the seven buildings which accommodate the various departments of work. In order of erection the buildings are as follows:

THE ACADEMY is a substantial three-story brick structure which was built in 1855, and long served as the only building of the College. It is now devoted solely to the work of the preparatory department.

CENTENARY CHAPEL was erected and equipped in 1884, at a cost of \$28,000. The ground floor contains a spacious lecture room and some class rooms. The auditorium above has a seating capacity of 1,200. It contains a large pipe organ and on its walls are a number of marble memorial tablets. It has recently been equipped throughout with electric lights.

SCIENCE HALL was erected in 1895. It has been pronounced by many to be one of the handsomest college buildings in the country. The walls are of buff brick, rising three stories above the basement, and surmounted by a stately tower. In this building is done all the college class-work. Hence it contains class rooms, laboratories, library, museum, and two spacious halls for the literary societies. It is heated by steam and is well lighted and ventilated. It occupies a site near the center of the campus. This building with its permanent equipment is valued at \$60,000.

CUPPLES HALL, erected in 1899, at a cost of \$26,000, is a dormitory for young men. The basement is of uncut stone with high ceiling, and contains the dining room with capacity for 125, and other rooms appertaining thereto. The superstructure is of mottled red brick, three stories in height; the roof is of red tile. There are ten large rooms on each floor, besides bath rooms and other conveniences. The entire building is heated by steam and lighted by electricity. It makes a charming residence for fifty young men.

THE GYMNASIUM was completed in 1906. Its outside dimensions are 46x102 feet. The basement contains locker rooms, shower baths, and boiler room. The walls of the building are brick, two stories in height. Within at the south end is a vestibule entry and the office. The unobstructed first floor is large enough for all drills and games. Overhead, running entirely around the walls is a suspended gallery six feet wide, affording a running track with twenty laps to the mile. This building is near the north end of the campus, adjacent to the athletic field. Cost, with equipment, about \$14,000.

The Stephens Museum

In recognition of the valuable and timely aid given by Mr. Lon V. Stephens in developing our scientific departments, the Board of Curators resolved to name the permanent collection of biological, mineralogical, and geological material the Stephens Museum.

The Museum contains a large number of specimens, embracing zoölogical, mineral, rock, fossil, and other collections. They include a representative collection of mollusks and other invertebrates, and some typical vertebrates from the well known Ward Science Establishment; choice collections of minerals from several dealers; a set of excellent German anatomical models from the National School Furnishing Company; and many fine specimens in the divisions of botany, archæology, etc. Noteworthy are some fine specimens of tracks from the sandstones of the Connecticut River valley, obtained through Bishop Hendrix; a very fine collection of marine invertebrates, obtained from the Smithsonian Institution through Senator Cockrell; and a valuable collection of rocks from the United States Geological Survey, also obtained through Senator Cockrell.

THE KILPATRICK MEMORIAL COLLECTION.—In 1904 a collection acquired partly by gift and partly by purchase from the Academy of Science of Kansas City, Mo., and for more than twelve years the property of the Scarritt Bible and Training School of Kansas City, was added to the museum. The authorities of the school have named this collection the Kilpatrick Memorial Collection, in memory of Professor J. W. Kilpatrick, who was preparing to install it in its present quarters at the time of his death. The collection contains more than eighteen hundred labeled specimens, principally minerals and fossils. Many of these are of rare beauty and of great scientific interest. There are specimens from nearly every state in the Union and from many foreign countries, and the collection covers the whole sweep of life recorded in the earth's crust, from the Cambrian to the present. In 1907 a fine life-size portrait of Professor Kilpatrick, the gift of his children, was presented to the College.

THE JOHNSON ARCHÆOLOGICAL COLLECTION.—Through the efforts of Rev. B. D. Sipple the College has secured a collection of about five thousand archæological specimens from Mr. C. E. Johnson, of Montgomery City, Mo. Mr. Johnson spent more than twenty years in making this collection, securing specimens from many states in the Union.

It is worthy of remark that many of our best specimens have been acquired—one, or a few at a time—through the thoughtful kindness of our friends who preserved and sent to us the good things that came in their way.

Laboratory of Biology and Geology

This Laboratory, in direct communication with the museum, is ample in size, well lighted from the north and east, and is furnished with desk-room and lockers for twenty students working at a time. It is provided with the apparatus necessary for the thorough study of plant and animal tissues, including a sliding

microtome of latest design, a complete outfit for paraffin imbedding, twelve compound microscopes, micrometers, dissecting microscope, turn-table, micro-chemical re-agents, and other apparatus. A new projecting lantern and an increasing collection of lantern slides, together with a number of wall charts, add to the facilities.

The work in mineralogy is provided for with gas for blow-pipe analysis, Jolly balance, and all necessary chemical re-agents.

Laboratories and Apparatus for Chemistry and Physics

The ground floor of Science Hall is devoted to the work in chemistry and physics. The lecture room occupies a place between the two laboratories, so as to be convenient for either. Its seats for forty rise in tiers, and command a clear view of all lecture experiments.

There are two chemical laboratories with lockers and all working facilities. There is the usual complement of hoods, water supply, gas fixtures, chemicals, balances, and other appliances for both general and analytical chemistry.

The physical laboratory is large and furnished with working tables, gas connections, sinks, etc. In a glass-partitioned annex is conveniently stored an extensive supply of apparatus for illustrating every department of physics. There is also an X-ray room, with good outfit, and a dark room for photometric and photographic work.

All of these rooms are well lighted and ventilated, and arranged with a view to practical work on the part of the pupils.

During the summer of 1908, valuable additions were made to the stock of physical apparatus. Importations duty-free were made of a Geryk oil-valve air pump, a spectrometer with its complement of prisms and grating, and a fine Sartorius chemical balance. Some of the other purchases were a D'Arsonval galvanometer with telescope and scale, an earth induction ap-

paratus, a postoffice Wheatstone bridge and box, batteries of various kinds, an arc lamp outfit for the lantern, Hoffman's electrolytic apparatus, a Studentia calorimeter with its outfit, a torsion apparatus, and many other pieces.

Psychological Apparatus

Psychological apparatus appropriate for a complete course in experimental psychology has been recently procured. This course is offered concurrently with the latter part of the introductory course in psychology. Demonstrations are made by the instructor and experiments are worked out independently by the students. The apparatus was supplied largely from the Yale University laboratory, and the course is, in the main, that offered in Judd's *Laboratory Manual of Psychology*.

In general, apparatus is furnished for investigations along the following lines: Visual experiences, binocular and monocular; biaural recognition of direction; tonal and cutaneous sensations; tactual space perception; sensation intensities (i. e., demonstration of Weber's Law); methods for recording movements; changes in circulation accompanying consciousness; changes in muscular tension and muscular co-ordination; voluntary modifications of movements and analysis of voluntary coordinations; effects of practice, including impression factors, motor and perceptual habits; distraction and fatigue; memory, attention, æsthetic appreciation, and experimentation with complex mental processes.

The apparatus was selected by Dr. Chas. H. Judd, then Professor of Psychology in Yale University, now head of the Department of Education in the University of Chicago.

The Library

The library occupies a large, well-lighted room on the second floor of Science Hall. About ten thousand volumes are now on the shelves, and the collection is constantly growing by donation and purchase; accessions during the last two years exceed two thousand volumes.

Central College recently purchased for the library several hundred volumes of standard and new fiction. The purchase of complete sets of the masters of fiction in standard editions, with attractive bindings, good paper and large type, fills a long-felt want in Central library, and places at the disposal of Central students a wide and practically complete range of the best fiction in our literature, and a judicious selection from foreign literature.

Beginning with the earliest masters of the novel, Samuel Richardson and Henry Fielding in their complete works, the college now has all the works of Scott, Eliot, Thackeray, Dickens, Stevenson, and Kipling. In foreign authors, the library has lately secured complete editions of Victor Hugo, Dumas, Balzac, Lessing, Storm, Schiller, the comedies of Molière, the writings of Ibsen, the novels of Tolstoy, and others; in American fiction, the works of Samuel Clemens, Bret Harte, Edgar Allan Poe, Hawthorne, Cooper's Leather-Stocking Tales, Holmes' Breakfast Table Series, and others. An attractive set is the stories and essays of Henry Van Dyke. The collected poems of Kipling, Sill, Harte, and Holmes have been added; also Irving's complete works.

The leading magazines and reviews are kept on file and the more important journals are regularly bound for permanent preservation. The following is the list of periodicals subscribed for:

American Historical Review	Library Work
American College	Literary Digest
American Journal of Science	Methodist Review (Quarterly, Nashville)
American Magazine	McClure's Magazine
Atlantic Monthly	Missionary Review
Biblical World	Modern Language Notes
Century	Modern Philology
Christian Advocate (New York)	Nation
Classical Review	National Geographic Magazine
Classical Quarterly	Nineteenth Century
Collier's Weekly	Outlook
Cosmopolitan	Popular Astronomy
Country Life in America	Popular Science Monthly
Dial	Quarterly Review
Die Woche	Reader's Guide
Edinburgh Review	Review of Reviews
Educational Review	Saturday Evening Post
Everybody's Magazine	School Review
Forum	St. Louis Republic
Harper's Magazine	Scientific American
Harper's Weekly	Scribner's Magazine
Hibbert's Journal	Success
Independent	World's Work
Ladies' Home Journal	
Lectures pour Tours	

Besides the above a number of valuable periodicals are sent to the Library by the courtesy of the publishers. Among them are the American Economist, American Industries, the American Messenger, the Missouri School Journal, the Christian Advocate (Nashville), the St. Louis Christian Advocate, School, the Pennsylvania Law Review, and the Western Methodist. Most of the college publications of Missouri and many from the neighboring states are made accessible through the courtesy of the exchange editor of the Central Collegian.

The Library is open from 8 to 12 and from 1:30 to 4:30. Assistants are in constant attendance, and efforts are made to give students the familiarity with modern library methods which is so important a part of the equipment of the educated man of to-day, who must not only possess information, but understand how to seek and find it for himself.

Two notable gifts have been received recently: (a) The David Rice McAnally Memorial Collection, consisting of about four hundred and fifty volumes, presented by the Ministers' Veteran Association; and (b) The private library of Professor O. H. P. Corprew, rich in the classics, literature, and history.

Friends of the College who are interested in the growth of the library are invited to correspond with the librarian in regard to its needs.

Addresses and Lectures

During the year the following addresses and lectures were given in Centenary Chapel before the students and faculty and citizens of the community:

Opening Sermon, Rev. J. E. McDonald, Marshall, Mo.

Benefactors' Day Address, "Expansion," Hon. A. M. Dockery, Gallatin, Mo.

"A Mission for Microbes," Illustrated, Professor T. Berry Smith.

"Schiller, a Champion of Freedom," Professor G. C. Cast.

"The Purchase of Louisiana," Professor W. W. Carson.

"A Study of Sociology," Professor I. R. Hudson.

"The Conflict between Paganism and Christianity at Rome,"
Illustrated, Doctor S. A. Jeffers.

"The Spiritual Conception of Life," Professor J. Reese Lin.

"Comets," Illustrated, Professor R. T. Bond.

The students have also had the opportunity of hearing during the last two years sermons and addresses by Bishop E. R. Hendrix, Kansas City, Bishop Edwin H. Hughes, San Francisco, Cal., Rev. S. P. Cresap, of the Missouri Conference, Professor J. L. Cuninggim, Vanderbilt University, Superintendent J. M. Greenwood, Kansas City, Dr. A. P. Parker, China, Rev. A. C. Johnson, Fulton, Mo., Hon. Howard A. Gass, State Superintendent of Public Schools, Hon. William H. Wallace, Kansas City, and other leaders of thought in Church and State.

Student Organizations

LITERARY SOCIETIES.—Connected with the College are two literary societies for young men, the Aristotelian and the Phi Alpha. These societies render efficient service in the intellectual and moral culture of their members. So excellent an adjunct are they to the literary work of the College that the Faculty would urge every pupil entering the College to become a member of one or the other of them.

The society halls have been recently refurnished, and are very attractive places for assembly and work. Each society has acquired during the past year a piano, the Aristotelians a Steinway Grand, and the Phi Alphas a Knabe Grand.

The musical interests of Central College are well cared for by the students. The Valentine Concert has become an annual event of no little interest in the musical life of the community. At this concert a high order of music is rendered by the Central College Band, the Aristotelian Orchestra, and by various vocal and instrumental soloists and quartettes.

The Central College Band is an efficient organization in which seventeen instruments are now represented as follows:

1st Clarinet, 2nd Clarinet, Piccolo, three Solo Cornets, 1st Cornet, 2nd Cornet, 3rd Cornet, 1st Alto, 2nd Alto, Trombone, Tenor, Baritone, Tuba, Snare Drum, Bass Drum.

The Orchestra of the Aristotelian Literary Society is maintained by members of that society and for several years has contributed excellent music for the various public functions given by the students. The following instruments are represented at present:

Two 1st Violins, two 2nd Violins, 1st Clarinet, 2nd Clarinet, 1st Cornet, 2nd Cornet, Trombone, Drums, Piano.

YOUNG MEN'S CHRISTIAN ASSOCIATION.—The Young Men's Christian Association is well organized in every branch of work. Students of both the College and Academy are eligible to membership. One of the parlors at Cupples Hall has been neatly furnished as a reading room and general headquarters for the

Association. In this room daily morning prayer meetings are held; the regular weekly devotional meetings are held each Sunday afternoon at Centenary Chapel. Four Bible-study classes and several mission-study classes are offered by the Association. Special effort is made to bring all students under these wholesome influences. A feature of the work of the Association that has been of great benefit to a number of young men during the past year, has been the Employment Bureau, which helps those young men who desire it to get work. A member of the Reception Committee will meet all students at the station in the fall.

For further information write to the President, E. S. Briggs, Fayette, Mo.

OFFICERS FOR 1910-1911.

E. S. BRIGGS, *President*.

R. F. HICKS, *Vice-President*.

J. W. DYSON, *Recording Secretary*.

H. U. CAMPBELL, *Corresponding Secretary*.

R. W. ADKISSON, *Treasurer*.

Alumni Society

On the twenty-seventh day of June, 1873, a number of the alumni of Central College organized the Alumni Society of the College. The Society is now composed of over three hundred members, nearly all of whom are prominent in their spheres of life. Under the by-laws of the Society, ante-bellum students, titled graduates, and graduates in three or more schools are eligible to active membership, while those who have received an honorary degree from the College and those who, not less than three years prior to the time of application for membership, have been students in the College for at least ten months are eligible to associate membership. During recent years the Society is becoming more and more a source of strength to the College. At the meeting of 1903 a resolution was adopted, urging local organizations for the purpose of strengthening College

ties and assisting in promoting the interests of Alma Mater. The Society already has a liberal representation upon the Board of Curators. The object of the Society is fully expressed by its preamble, which is as follows:

PREAMBLE

"We, the Alumni of Central College, for the purpose of perpetuating the memories of our College associations, for advancing the interests of our Alma Mater, and for preserving that mutual fellowship and union which characterized us in our labors in College, do hereby organize ourselves into a Society, the object of which shall be the good of its members and the honor of our College."

ALUMNI OFFICERS FOR 1909-1910.

REV. A. B. CULBERTSON, Fayette, *President*.

REV. C. W. TADLOCK, Fayette, *Vice President*.

REV. B. D. SIPPLE, Fayette, *Secretary and Treasurer*.

The regular meeting for the election of officers and nomination of Curators is held during commencement week. All members should endeavor to attend.

A committee of the Alumni Society has in charge the preparation of an illustrated History of Central College.

It is earnestly desired that all alumni and old students heartily co-operate in this undertaking. Send sketches, pictures, etc., to the secretary, Fayette, Mo.

Athletics

As the proper development of a young man's physical being is recognized as a very desirable part of his college training, it is the policy of Central College to encourage clean athletics in all its phases. *To become a member of any team in athletics a student under twenty-one years of age must have the written permission of his parents or guardian, and must be doing work satisfactory to the Faculty.*

The athletic sports of the College are supported largely by the Athletic Association, which is composed of the entire Faculty and student body. The membership fee is \$1.50 per semester, and entitles the members to free admission by season ticket to all the athletic contests and exhibitions of the College. The president, vice-president, and secretary of the Association and the managers of athletic teams are elected from the student body. For the direction of the athletic interests of the College there is an athletic committee, consisting of two members of the Faculty, chosen by the Faculty, two alumni elected by the Athletic Association, and the three officers of the Association. This committee supervises all schedules of games and audits the accounts of the managers of the several athletic teams. The treasurer of the Association is a member of the athletic committee, elected by the committee.

The Johnson Field, donated by Mrs. Catherine Johnson, joins the campus on the north. This field has recently been enlarged by gifts from the mayor and the town, and improved so that it is well fitted for all kinds of athletic sports.

The Tennis Club has a large membership. The courts are situated at the east end of Science Hall.

Throughout the school year the gymnasium is open to all the students, who will there have systematic instruction in physical culture under a capable director. This work is required of all students except such as may be excused by the Faculty.

Government

The government of the College is conducted by the President and Faculty, under the authority and supervision of the Curators.

It is thought more conducive to good order and more helpful to the student that there should be a few simple rules for the regulation of conduct, rather than an elaborate code of

requirements. In the year 1868 these words were entered in the Matriculation Record of the College:

"I enter this institution with a sincere purpose to fulfill the duties of a good student, and to conduct myself at all times according to the rules of propriety accredited in good society."

Every student since that time has signed his name to this declaration. The one demand made is that each student shall conduct himself as a gentleman, and he is thrown upon his own resources to interpret this rule and to observe it.

Students are sent to college to be fitted for honorable and useful stations in life. This object will be steadily kept in view by the Faculty, and their concern will be more for character than for the number of students. For the attainment of this object there must be a wholesome moral and religious sentiment pervading the body of the students; therefore, when any student by continued neglect of duty ceases to receive benefit from his connection with the College, and, by his example and influence, becomes injurious to others, he will not be allowed to remain longer in the institution, but his parent or guardian will be requested to remove him.

Reports are mailed to parents and guardians at the middle and close of each semester; special reports, however, will be sent whenever, in the judgment of the Faculty, a student is derelict in the performance of his duties.

Fees and Expenses

The collegiate year is divided into two semesters, and, with the exception of the fee for diploma, the following charges are for each semester:

Graduate students	\$20.00
Tuition in College	25.00
Tuition in Academy	20.00
Incidental fee	6.00
Athletic Association fee	1.50
Fee for diploma	5.00

Laboratory fees:

Advanced Chemistry.	4.00
Mineralogy	4.00
Other college classes, each.	2.00
Academy classes	1.00

The incidental fee is required of every pupil, and must be paid at enrollment. No student will be allowed to recite until settlement has been made with the Registrar and an entrance card secured.

The first two days of each semester are registration days. Any one registering thereafter will be required to pay an additional fee of \$1.00.

Entrance cards must be returned to the registrar within ten days from date of entrance. A fine of fifty cents a day will be imposed for failure to comply with this regulation. Such fees will be credited to the general library fund.

No deduction will be made in College fees except for tuition in case of protracted illness. Students entering after the first month are charged from the date of entrance.

ESTIMATE OF COST FOR YEAR IN COLLEGE

	Low	Liberal
Tuition and fees	\$ 65.00	\$ 75.00
Boarding	120.00	160.00
Books, stationery, etc.	15.00	25.00
Laundry.	10.00	15.00
Total.	<u>\$210.00</u>	<u>\$255.00</u>

Dormitories

Cupples Hall is a modern building, having twenty-five large, well-lighted rooms. It is heated by steam and lighted by electricity, and has a bath room on each floor. Each room is fur-

nished with everything except bedding and toilet supplies. The rooms are intended for two students each, who furnish bedding and toilet articles and pay for laundering bed clothes and towels.

The College furnishes no board to students. The hall is in charge of a manager, appointed by the College authorities, and students provide for themselves as a boarding club, using the kitchen and dining room of the hall.

The charge for the rooms is as follows: Where two persons occupy a room, fifteen dollars each per semester; when three occupy the same room, ten dollars each per semester. These charges must be paid in advance.

On entering the dormitory, the student is expected to deposit a damage fee of two dollars, against which charges will be made for unrepaired damages to rooms or furniture used by him. The unused balance will be returned when the room is vacated.

Students desiring to reserve rooms should write to the President. A student wishing to reserve a room must deposit three dollars, to be forfeited in case of failure to take the room.

SCHOLARSHIPS, PRIZES, AND LOAN FUNDS

High School, Academy, and District Scholarships

Central College offers a scholarship to each of the graduating classes in the high schools of the State which conduct three or four year courses; to each of the three Central Academies located respectively at Fayette, Palmyra, and Richmond; and to each of the presiding elders' districts of the three patronizing conferences. The high school and academy scholarships are awarded on the basis of character and scholarship to the best male student of the graduating class, provided his rank in scholarship does not fall below the general average of the whole class.

It is desirable that certificates of award be issued on the day of graduation, but where this is not done applicants may send testimonials of good moral character and a statement of grades and rank in scholarship for the current year certified by the superintendent or principal of the high school to the Registrar of Central College.

District scholarships are awarded on the recommendation of the presiding elder of the district.

The following conditions apply to all three classes of scholarships:

I The holder must have completed at least 12 units of the entrance requirements given on pages 35-39 of this catalogue.

II The scholarship is good for one year only, and exempts the holder from payment of tuition, but not from other fees.

III The scholarship may be forfeited at the close of the first semester in case the holder fails to maintain a satisfactory standing in class work or deportment.

IV The names of holders of scholarships and of applicants therefor should be in the hands of the Registrar of Central College by September 1st.

Joseph C. Hendrix Scholarships

By bequest of Hon. Joseph C. Hendrix, of Brooklyn, New York, a former student of Central College, who died in November, 1904, there were established two scholarships of the value of one hundred and twenty-five dollars each annually to be awarded to the students of Central College and Academy who in the judgment of the Faculty are most worthy at the close of each year's work. These scholarships are designed to stimulate students of limited means to secure a complete collegiate course.

The conditions of award are as follows:

I The scholarships will be available for undergraduates only, and, when other things are equal, preference will be given to the more advanced student.

II Students desiring to avail themselves of these scholarships must make written application on prescribed form, which may be obtained from the Registrar. These applications should be in the hands of the Faculty by May 1st of the current year.

III The awards will be made at the close of the scholastic year and will be based upon the entire scholastic career of the applicant, including scholarship, deportment, promise of future usefulness, and general bearing in every walk of life.

IV The money pertaining to these scholarships shall be held in trust for the benefit of the holders thereof and shall be paid to them upon the approval of the President in four equal sums, viz., at the beginning and middle of each semester, during the scholastic year for which they are available.

V First and second alternates shall be named, one or both of whom shall enjoy all the benefits of the scholarships in case one or both of the principals shall fail to attend during the scholastic year following the award.

VI In exceptionally worthy cases a scholarship may be awarded to the same student a second time.

The following persons have held these scholarships:

- 1907—Eugene Reginald Livesay, Sherman Allen Reeves
 1908—Evered Lester Whitehead, David English Smith
 1909—Joseph William Dyson, Herbert Bascom Bruner

Prizes and Contests for Undergraduates

No student who is neglectful of any college duties will be considered eligible to contend for any prize, or to represent the College in the public exercises of the literary societies. The whole number of recitations per week must be at least thirteen, not more than three of which may be graduate studies. Contestants must have completed all the studies of the Academy. This, however, does not apply to the prize for Declamation.*

I The *William A. Smith Prize* of twenty dollars, endowed by Bishop E. R. Hendrix, is awarded for excellence in oratory. The contestants for this prize are selected by the two literary societies of the College from the three highest classes, and the contest is held during commencement week. The orations must not exceed 1,500 words, and must be submitted to the Faculty at least three weeks before commencement.

This prize has been awarded as follows:

- | | |
|---------------------|----------------------|
| 1875—C. B. Rush | 1892—J. T. Gose |
| 1876—R. J. Coleman | 1893—F. L. Bronaugh |
| 1877—W. D. Vandiver | 1894—T. L. Anderson |
| 1878—T. S. Dines | 1895—W. M. Court |
| 1879—R. E. Ball | 1896—W. H. Bronaugh |
| 1880—E. B. Clark | 1897—R. Wilkinson |
| 1881—W. C. Scarritt | 1898—H. J. Potter |
| 1882—T. H. Harvey | 1899—C. M. Hay |
| 1883—W. M. Hough | 1900—E. H. Selecman |

| 1891—A. F. Smith | 1909—E. R. Livesay |

*For prizes offered to Academy students, see page 65.

II The *Dockery Prize* of twenty dollars, endowed by Governor A. M. Dockery, is awarded at the end of the year for the best general scholarship.

This prize has been awarded as follows:

1878—E. E. Penn	1894—J. T. Gose
1879—R. E. Ball	1895—O. C. Lester
1880—T. H. Harvey	1896—C. M. Barr
1881—A. R. Strother	1897—E. M. Violette
1882—E. B. Craighead	1898—C. B. Duncan
1883—B. P. Searcy	1899—C. M. Hay
1884—H. C. Penn	1900—F. C. Bowles
1885—A. C. Millar	1901—Helen McCoy
1886—R. T. Kerlin	1902—D. L. Mumpower
1887—W. W. Wood	1903—W. J. Osburn
1888—J. N. Jackson	1904—Ethel Rush
1889—G. H. Burr	1905—F. C. Heck
1890—W. M. Ledbetter	1906—R. H. Kirk
1891—A. F. Hendrix	1907—R. R. Walton
1892—Charles Franklin	1908—R. W. Adkisson
1893—F. A. Briggs	1909—Fannie Cochran

III The *Disclaimer's Prize* of twenty dollars, given by the two literary societies of the College, is contested for on the second Monday in April. Each Society may elect three representatives to compete for this prize.

This prize has been awarded as follows:

1875—J. A. Rich	1893—X. P. Wilfley
1876—C. T. Noland	1894—T. L. Anderson
1877—R. H. Hamilton	1895—W. R. Porter
1878—E. Yates	1896—C. C. Selecman
1879—W. C. Scarritt	1897—W. H. Bronaugh
1880—E. B. Clark	1898—C. M. Hay
1881—B. C. Hinde	1899—P. P. Prosser
1882—A. P. Warren	1900—R. I. Tolson
1883—W. M. Hough	1901—C. W. Tadlock
1884—G. M. Smiley	1902—C. W. Wagoner
1885— <i>Not awarded</i>	1903—J. L. Davis
1886—W. W. Wood	1904—W. G. Borchers
1887—L. R. Wilfley	1905—F. P. Drace
1888—A. B. Culbertson	1906—S. M. Williams
1889—A. F. Smith	1907—Grant Johnson
1890—S. A. Grantham	1908—E. R. Livesay
1891—S. P. Cresap	1909—E. T. Raney
1892—F. L. Bronaugh	

IV The *Adam Hendrix Prize* of twenty dollars, endowed by Mrs. Adam Hendrix, will be awarded at the end of the year for the best original composition of not more than 3,000 words.

This prize has been awarded as follows:

1877—C. R. Forster	1891—J. H. Owings
1878—R. E. Ball	1892—Mary Hendrix
1879—T. S. Dines	1893—L. C. Knowlton
1880—S. W. Roberts	1894—J. T. Gose
1881—E. Ward	1895—T. S. Nishikawa
1882—T. H. Harvey	1896—T. L. Anderson
1883—E. B. Craighead	1897—O. C. Lester
1884—W. H. Key	1898—E. B. Crooks
1885—H. C. Penn	1899—C. S. Lewis
1886—P. S. Rader	1900—T. M. Rennolds
1887—P. W. Horn	1905—Lilburn Kingsbury
1888—A. W. Walker	1907—J. M. Monroe
1889—G. H. Burr	1908—T. P. Wood
1890—J. A. Parks	1909—M. C. Magers

V The two *Central Collegian Prizes* of ten dollars each are given by the two literary societies of the College and are subject to their own regulations. They are awarded for the best short story and the best essay published during the year in the *Central Collegian*. Before 1905, there was one *Collegian Prize* of twenty dollars.

This prize has been awarded as follows:

1879—R. E. Ball	1897—O. C. Lester
1880—J. D. Lindsay	1898—E. B. Crooks
1881—T. H. Harvey	1899—C. S. Lewis
1882—W. H. Key	1900—P. W. Usry
1883— <i>Not awarded</i>	1901—J. I. Sears
1884—H. C. Penn	1902—D. L. Mumpower
1885—A. C. Millar	1903—C. Orear
1886—B. P. Searcy	1904—C. S. Rennison
1887—Mary B. Swinney	1905—E. V. Dyson and Minnetta Holland
1888—P. W. Horn	1906—C. W. Blakey and M. C. Davis
1889—P. W. Yancey	1907—C. W. Blakey
1890— <i>Not awarded</i>	1908—R. R. Walton and H. R. Combs
1891—J. A. Parks	1909—T. P. Wood and B. H. Gault
1892—Mary Hendrix	
1893—X. P. Wilfley	
1894—L. M. Garrett	
1895—R. L. Denning	
1896—F. J. Mapel	

Arthur Davis Loan Fund

In memory of his first-born son, who died in November, 1882, Mr. Arthur F. Davis, a former student and for more than twenty-five years a Curator and treasurer of Central College, whose untimely death on January 4, 1907, deprived the College of one of its truest friends, gave \$5,000 to endow the "Arthur Davis Loan Fund." The income of this fund will be loaned to such students as shall be approved by the Faculty, to enable them to complete their education. Preference will be given to those students who have been longest in college, and whose habits of application are best known. In establishing this fund the generous founder wrote:

"During my connection with Central College as a student and Curator, I have known young men of a high order of talent compelled to leave college for want of means to sustain themselves, and I recognize the necessity of some provision to assist them in prosecuting their studies."

Ministerial Aid Society of the Missouri Annual Conference

Since 1876 the Ministerial Aid Society of the Missouri Annual Conference has rendered valuable service to the cause of ministerial education by establishing and maintaining a loan fund for ministerial students. At present the fund amounts to \$3,500, and if all claims were promptly met, the board would have about \$700 at its disposal each year. More than one hundred ministers have been aided by this fund and untold good has been accomplished.

Rev. B. D. Sipple, Fayette, Mo., is corresponding secretary of the board of managers.

Self Help

A number of young men of high purpose, but limited means, are enabled to pay for all or a portion of their board and lodging by waiting on the tables in Cupples Hall, by caring for furnaces, or by otherwise helping about the homes in the community.

While all worthy efforts of young men to work their way through College receive the hearty recognition of both students and Faculty, it is well to bear in mind that only those in good health and of more than average mental ability can hope to secure satisfactory results when they are compelled to give a considerable portion of their time to outside work.

Self Help and the Y. M. C. A.

College authorities everywhere realize the fact that many deserving young men are being deprived of a collegiate education because of the lack of funds to defray necessary expenses. With this fact in mind the Young Men's Christian Association, a few years ago, introduced the Employment Department into the College and has charge of that department. The purpose of the Employment Bureau is to secure work for young men of limited means which will help them and make it possible for them to pursue regular courses in college.

This Employment Bureau has become one of the most important accessories of our Young Men's Christian Association and, in fact, of the College itself. Through its agency many young men work their way through school waiting on tables, doing work in private houses, caring for furnaces and the like.

As an indication of what this department has done and is doing, the following report, copied from the Y. M. C. A.

Handbook of 1909-1910, may be of interest to our patrons and prospective students. This report was for the year 1908-1909.

Number of men finding employment during year...	20
Amount or value of work done.....	\$2,377.00
Average per person.....	118.85
Average per month for Bureau work.....	264.00

As for our plans for the year 1910-1911, we shall try to find employment for more young men than ever before and feel confident of success.

The Employment Bureau next year will be under direction of C. A. Clingenpeel, who has had some experience in the work he has been called upon to direct, and he will be glad to correspond with any young man of limited means who is seriously considering a college course in Central College. For full particulars regarding employment, address C. A. Clingenpeel, Fayette, Mo.

REQUIREMENTS FOR ADMISSION

It is very important for all students to be present at the opening of the semester, in order that the work of matriculation, registration, and examination may be completed promptly.

Satisfactory evidence of good moral character is required of all applicants for admission. It is understood that when a student matriculates, he thereby pledges himself to observe all the rules of the College.

No one will be allowed to recite until settlement has been made with the Registrar and an entrance card secured.

Young men and young women are admitted upon the same conditions, are subject in every respect to the same regulations, and are equally eligible to the degrees conferred by the College.

Candidates for admission to the College must pass satisfactory examinations, or produce acceptable certificates of proficiency, in the following subjects: English, two Foreign Languages, Mathematics, History, and Science, amounting in all to fifteen units. A "unit" denotes an amount of work in one subject equal to daily recitations during one school year. The requirements set forth in this bulletin are those of the Carnegie Foundation.

English, Three Units

The scope of the work required for admission in English is indicated by the books given below, which are recommended by the leading associations of preparatory schools and colleges:

READING: The candidate will be required to present evidence of a general knowledge of the subject-matter, and to answer simple questions on the lives of the authors. In case of examination, the student will be expected to write a paragraph or two on each of several topics, to be chosen by the candidate from a considerable number—perhaps ten or fifteen—set before

him in the examination paper. The treatment of these topics is designed to test the candidate's power of clear and accurate expression, and will call for only a general knowledge of the books. In place of a part or the whole of this test, the candidate may be allowed to present an exercise book, properly certified by his instructor, containing compositions or other written work done in connection with the reading of the books. The books set for this part of the examination will be:

In 1910, 1911:

Group 1 (two to be selected). Shakespeare's *As You Like It*, *Henry Fifth*, *Julius Caesar*, *The Merchant of Venice*, *Twelfth Night*.

Group 2 (two to be selected). Bacon's *Essays*; Bunyan's *The Pilgrim's Progress*, Part 1; *The Sir Roger De Coverley Papers* in *The Spectator*; Franklin's *Autobiography*.

Group 3 (one to be selected). Chaucer's *Prologue*; Spenser's *Faerie Queene* (selections); Pope's *The Rape of the Lock*; Goldsmith's *The Deserted Village*; Palgrave's *Golden Treasury* (First Series), Books 2 and 3, with especial attention to Dryden, Collins, Gray, Cowper, and Burns.

Group 4 (two to be selected). Goldsmith's *The Vicar of Wakefield*; Scott's *Ivanhoe*; Scott's *Quentin Durward*; Hawthorne's *The House of the Seven Gables*; Thackeray's *Henry Esmond*; Mrs. Gaskell's *Cranford*; Dickens' *A Tale of Two Cities*; George Eliot's *Silas Marner*; Blackmore's *Lorna Doone*.

Group 5 (two to be selected). Irving's *Sketch Book*; Lamb's *Essays of Elia*; DeQuincey's *Joan of Arc* and *The English Mail Coach*; Carlyle's *Heroes and Hero Worship*; Emerson's *Essays* (selected); Ruskin's *Sesame and Lilies*.

Group 6 (two to be selected). Coleridge's *The Ancient Mariner*; Scott's *The Lady of the Lake*; Byron's *Mazeppa* and *The Prisoner of Chillon*; Palgrave's *Golden Treasury* (First

Series), Book 4, with especial attention to Wordsworth, Keats, and Shelley; Macaulay's *Lays of Ancient Rome*; Poe's *Poems*; Lowell's *The Vision of Sir Launfal*; Arnold's *Sohrab and Rustum*; Longfellow's *The Courtship of Miles Standish*; Tennyson's *Gareth and Lynette*, *Lancelot and Elaine*, and *The Passing of Arthur*; Browning's *Cavalier Tunes*, *The Lost Leader*, *How They Brought the Good News from Ghent to Aix*, *Evelyn Hope*, *Home Thoughts from Abroad*, *Home Thoughts from the Sea*, *Incident of the French Camp*, *The Boy and the Angel*, *One Word More*, *Hervé Riel*, *Pheidippides*.

STUDY AND PRACTICE: This part of the examination presupposes the thorough study of each of the works named below. The examination will be upon subject-matter, form, and structure, and will also test the candidate's ability to express his knowledge with clearness and accuracy. The following will be the books required for examination in 1910 and 1911.

Shakespeare's *Macbeth*; Milton's *Lycidas*, *Comus*, *L'Allegro*, and *Il Penseroso*; Burke's *Speech on Conciliation with America*, or Washington's *Farewell Address*, and Webster's *First Bunker Hill Oration*; Macaulay's *Life of Johnson*, or Carlyle's *Essay on Burns*.

In addition, the candidate may be required to answer questions involving the essentials of English grammar, and questions on the leading facts in those periods of English literary history to which the prescribed works belong.

Foreign Languages, Five Units

Four units of Latin are required of all students. The remaining unit may be either Greek, for entrance upon the course leading to the degree of A. B., or German, for entrance upon the course leading to the degree of B. S. The following statement shows the work which must have been done in these subjects:

LATIN: The work for admission covers four books of Cæsar's *Commentaries*, six orations of Cicero, and six books of Vergil's *Æneid*. An equivalent amount from Ovid is accepted in lieu of two books of Vergil's *Æneid*. One year of Latin prose composition in a standard book on this subject is also required. The student should also have mastered some text-book on mythology, such as that of Gayley or Bulfinch.

GREEK: White's *Beginner's Greek Book* or an equivalent, thoroughly mastered, is required.

GERMAN: The requirement in German comprises: (a) A thorough knowledge of the essentials of grammar; (b) the reading of about 150 pages of easy prose; (c) careful drill in pronunciation; writing German from dictation.

Mathematics, Three Units

ALGEBRA: The requirement in algebra implies a ready knowledge of factoring, involution, evolution, radicals, fractional and negative exponents, radical equations, and simultaneous quadratic equations. Bowser's *College Algebra* is the text used.

GEOMETRY: Plane and solid geometry with special emphasis on original work such as the exercises found in Wentworth's *Geometry*.

History, One Unit

In addition to the work in United States History given in the common school course, the student must offer a full year in one of the following fields: Ancient history to 800 A. D., Medieval and Modern history, English history, United States history.

A year's work in general history will not be accepted as the equivalent of a year's work in one of the above fields.

Science, One Unit

An elementary course in biology, chemistry, or physics, taught by laboratory methods.

Elective Subjects, Two Units

For the remaining units, the candidate for admission may offer any approved secondary school subjects which he has pursued for a period of not less than one school year each of daily recitations.

Admission by Certificate

The certified grades (not diplomas) of the Central Academies at Fayette, Palmyra, and Richmond, and of approved high schools, are accepted instead of examinations on the subjects offered for admission. No certificate from a preparatory school will be accepted, in lieu of examination, as covering any part of the work of the college course.

Admission by Examination—Deficiencies

Candidates for admission who are unable to present acceptable certificates covering entrance requirements may gain entrance credit by satisfactorily passing an examination on each subject not so covered. Students whose preparation is not sufficient to admit them to the College will be assigned to academy classes in the subjects in which they are deficient; and no student will be permitted to neglect such deficiencies in order to take courses in the College. Students may, however, be admitted to the Freshman class as conditioned students, provided that their deficiencies do not exceed two units.

Admission to Advanced Standing

Students who have attended other colleges of approved standing, such as those in the Missouri College Union, will be admitted to advanced standing without examination, upon presentation of a properly certified statement of work done, accompanied by a letter of honorable dismissal. No degree will be conferred upon any student who has not been in residence at Central College at least one year.

Special Students

It is very desirable that all students continue their studies to graduation. Even when a student does not expect to graduate, it will usually be wise to pursue one of the regular courses while in college, and irregular selection of studies will not be permitted without good reason. Candidates who have satisfied the requirements in English, History, and one other subject, or persons of mature years who give evidence of well-defined purpose and who desire to pursue some special line or lines of work without becoming candidates for a degree may be admitted as special students. This will be done only upon written application, and for reasons satisfactory to the Faculty. Such students are subject to the same regulations as other students, with regard to the quality of work done and attendance upon college exercises.

REQUIREMENTS FOR DEGREES

Required and Elective Work

The courses offered by the College are designed to give the student a liberal education equal in grade to the undergraduate work of the best institutions in the country. Such a course is the best possible for the student whose work ceases with the college, as well as for the student who is preparing for graduate study along special lines in a university. Individual aptitudes and purposes are recognized by liberal provision for elections. The studies of the first two years are closely prescribed, and include those essential to liberal culture as well as those which form the basis of advanced work. The studies of the Junior and Senior years are largely elective. No class in an elective course will be organized for less than three students.

Amount of Work

The unit of reckoning in the College is the "credit hour," which denotes one recitation per week for one semester. Thus a "three-hour" course recites three times per week, and entitles the student to a credit of three hours for each semester through which the course runs.

Every student is required to take at least thirteen hours of recitation work or lectures per week, unless a smaller assignment is granted by the Committee on Instruction. Two hours of laboratory work are reckoned as the equivalent of one hour of recitation or lecture work.

Not more than sixteen hours may be taken except by permission of the Committee.

The Bachelor's Degree

The College confers two baccalaureate degrees, *Bachelor of Arts* and *Bachelor of Science*. To receive a degree, the candidate must have satisfactorily completed the required and elective studies of one of the four-year courses outlined below. If the candidate has been granted advanced standing in this institution after attending elsewhere, a minimum residence period of one year will be required before any degree will be granted.

The Master's Degree

The degrees of *Master of Arts* and *Master of Science*, respectively, are conferred upon students who hold the corresponding baccalaureate degrees from Central College or from some other college of equal rank, and have pursued in residence a course of advanced study, approved by the Faculty, for a period of not less than one year. The studies selected must be chosen from at least three departments of college instruction and must be equivalent to four courses of three hours each per week. With the approval of the professor of the department, undergraduate courses may be selected, provided they shall not be lower than the third or Junior year, and provided, furthermore, that additional work shall be required of the candidate at the discretion of the instructor. Evidence of the candidate's proficiency in the chosen studies is given by examinations, which must not fall below a grade of 80, and by the preparation of an approved thesis under the direction of one of the professors in whose department the candidate is pursuing advanced work.

GROUPS OF STUDIES LEADING TO THE DEGREES OF BACHELOR OF ARTS AND BACHELOR OF SCIENCE

DEPARTMENTS OF INSTRUCTION

Courses designated by a number with the letter *a* attached are given the first semester only. Those designated by a number with the letter *b* attached are given the second semester only. Those designated merely by a number are continuous courses and are given both semesters.

PHILOSOPHY AND EDUCATION

Philosophy

Inductive Logic

COURSE Ia.

Since the reasoning in practically all of the sciences is inductive, and since inductive reasoning is the reasoning on which most of the actions of daily life are based, a thorough course in Inductive Logic is offered. Three hours per week, first semester. Open to students who have completed English II.

Deductive Logic

COURSE IIb.

This course is intended to give those who wish to specialize in Philosophy a thorough acquaintance with the principles of deductive thinking.

Fallacies are carefully investigated, and Praxis is emphasized throughout the course. Three hours per week, second semester. Open to students who have completed English II.

Psychology

COURSE IIIa.

This course begins with a thorough study of the nervous system and the organs of sense. Sensations and their relations are then taken up, and the higher and more complex forms of mental action are carefully studied.

The text used is Judd's *Introduction to Psychology*, and experimental demonstrations are given by the instructor throughout the course with apparatus selected by Dr. Judd.

Concurrently with the latter part of the course experimental investigations are made by the students. As a guide in this work Judd's *Laboratory Manual of Psychology* will be used.

The bearing of psychological investigations on the problems of Metaphysics and Epistemology is indicated, and the relations of Psychology to Aesthetics, Ethics, and kindred subjects is pointed out.

This course thus serves both as a study of consciousness and as a preparation for the further study of Philosophy. Three hours per week, first semester. *Required for graduation.* Open to those who have completed English II.

Educational Psychology

COURSE IIIb.

In this course the application of Psychology to teaching is emphasized. The order of development of the aptitudes and powers of children is studied, especial attention being given to the period of adolescence.

Particular reference is given to habit, the nature of educational training and discipline, the psychology of attention and interest, apperception, memory, imagination, reasoning, and kindred topics as they bear on education. Three hours per week, second semester. Open to those who have taken Course IIIa. *Required for graduation.*

History of Philosophy

COURSE IVa.

In this course the main stress will be laid on the works of the great classical and great modern philosophers. Only brief notice will be taken of Neo-Platonism and Scholastic Philosophy. Especial attention will be given to the bearing of the various philosophies studied on the problems of Ethics. Weber's *History of Philo-*

sophy is the text used. Open to those who have had Philosophy I and II, or Philosophy III. Three hours per week, first semester.

Ethics

COURSE Vb.

A brief history of ethical theories is given in this course. More extended study is given to our moral ideas in themselves, and to the unfolding of their postulates and implications. The theory thus reached is applied to the construction of a concrete code of conduct. Open to those who have had Philosophy I, II, III, or IV. Three hours per week, second semester.

Education

History of Education

COURSE Ia.

This course is intended to lay the foundation for a thorough study of Education both as a science and as an art. After a brief study of Greek and Roman education some attention is paid to the methods and aims of mediaeval education. The main study in this course is, however, of the psychological, scientific, and sociological schools of education which culminate in modern eclecticism.

An assigned text is studied, and parallel reading is required. Three hours per week, first semester. Open to those who have taken Philosophy III, or who are taking it concurrently with this course.

Principles of Education

COURSE IIb.

This course is intended to ground the student thoroughly in the fundamental principles of education. The respective values of the various studies of a well rounded course below the college work are discussed, the proper correlation of studies is considered, and concurrent development of both the body and the mind of a student is insisted on.

The instruction is given by the examination of assigned texts, by lectures, discussions, theses, and reading of parallel works.

Three hours per week, second semester. Open to those who have completed Philosophy III, or who have completed Philosophy IIIa, and are taking Philosophy IIIb, concurrently with this course.

Methods of Teaching

COURSE IIIa.

In this course instruction is given both in the elements of general method and in methods for special studies. Text work and parallel readings are assigned, and the class is conducted by lectures, recitations, and discussions both oral and written.

Three hours per week, first semester. Open to those who have completed Philosophy III, or who are taking it concurrently with this course.

Observation and Practice Teaching

COURSE IVb.

In this course observation of teaching, done under supervision of the instructors in the Academy, is offered, and actual teaching by the students is done under the supervision of the instructor in Education. The instructor acts as critic teacher. Three hours per week, second semester. Open to those who have completed Education III.

Graduates of Central College who have completed Philosophy III and the courses in Education will receive, without examination, Missouri teachers' state certificates valid for three years. These will be issued by the State Superintendent of Public Schools. On or before the expiration of the three-year certificate by limitation, the State Superintendent of Public Schools may, on satisfactory evidence that the applicant has taught successfully at least sixteen months within the three-year period, grant a life certificate to teach in the public schools of Missouri.

The Bible

PRESIDENT WEBB.

PROFESSOR CARSON.

PROFESSOR LIN.

This department is organized in order to effect the purpose of the College, viz.: "To afford to young men and women under the direction of the Church an education distinctively Christian." The Bible is a part of the College curriculum, not taught from the standpoint of theological dogma, but rather from that of Christian history and morals and evangelical principles.

COURSE I. Old Testament History. One hour per week, throughout the year. Required of all Freshmen. PROFESSOR CARSON.

COURSE II. The Bible as Literature. One hour per week, throughout the year. Required of all Sophomores. PRESIDENT WEBB.

COURSE III. The Life of Jesus. One hour per week, throughout the year. Required of all Juniors. PROFESSOR LIN.

Greek and Latin

PROFESSOR JEFFERS.

All courses in this department recite three hours per week.

Greek

Courses Ia, Ib, IIa, IIb are required of students in the A. B. course.

COURSE Ia. Xenophon's *Anabasis*, Books I-III. Pearson's *Greek Prose*.

COURSE Ib. Homer's *Odyssey*, Books I-IV. As much attention as is practicable will be given the metrical reading of the poem. Selected passages will be committed to memory. A study of Jebb's

Introduction to Homer will constitute a part of this course. Required of Freshmen in the A. B. Course.

COURSE IIa. Lysias, *Selected Orations*.

COURSE IIb. Demosthenes, *On the Crown*. These courses will furnish the background for a somewhat extended study of the Attic Orators, and of Greek History from the beginning of the Peloponnesian war to the battle of Chaeronea.

COURSE IIIa. Sophocles, *Oedipus Tyrannus*, and *Oedipus Coloneus*. *Studies in Sophocles*.

COURSE IVa. Modern Greek. This course will commence with a study of "*A Practical Method in the Modern Greek Language by Eugene Rizo-Rangabe*," and as soon as a sufficient foundation has been gained the class will begin reading the Modern Greek Novel, *Loukes Lares*. The class may elect either IIIa or IVa, but both courses will not be given in 1910-1911.

COURSE IIIb. Euripides, the *Alcestis*; the *Ion*; papers on topics relating to Greek tragedy.

Latin

Courses Ia, Ib, IIa, IIb are required of candidates for the A. B. degree; they are elective with French for those in the B. S. Course.

COURSE Ia. Cicero, *De Senectute*, and *De Amicitia*. Latin writing.

COURSE Ib. Livy, Book I; Plautus, the *Captivi*; Terence, the *Andria*.

COURSE IIa. Horace. *Selected Odes, Satires, and Epistles*. The metrical reading of the *Odes* will receive emphasis. Papers will be required embodying the results of a study of the poet's place in the history of Latin Literature, his art, and thought.

COURSE IIb. Tacitus, the *Agricola* and the *Germania*.

COURSE III. Lucretius, *De Rerum Natura*. Books I, II, III, and V will be read and discussed in class. This course will give students opportunity for original investigation of literary and philosophical questions which arise in the study of Lucretius, and written reports embodying the results of such studies will be expected.

Modern Languages

ASSOCIATE PROFESSOR CAST.

German

COURSE I. Elementary. The work of this course consists of a thorough study of the essentials of German Grammar, daily written exercises, drill in reading, and practice in speaking. German is used in class room as far as practicable in this and all the other German courses. Texts: Joynes and Wesselhoeft, *German Lesson Grammar*; Seeligmann, *Altes und Neues*; Heyse, *L'Arrabbiata*, etc. Three hours per week.

COURSE II. Review and continuation of grammar and language study, prose composition, conversation, reading of about 500-600 pages of moderately difficult German, including one of Schiller's dramas. In connection with this the structure of the drama and the life of Schiller are studied. Parallel reading required. Texts: Carmen Sylva, *Aus meinem Königreich*; Mosher, *Willkommen in Deutschland*; Baumbach, *Der Schwiegersohn*; Schiller, *Wilhelm Tell*; Thomas, *Practical German Grammar*, etc. Three hours per week.

COURSE III. Studies in German literature. Some of the best works of Lessing and Goethe are studied critically, also the life and literary activity of these men as far as practicable in a course of this nature. Outside reading with reports in German is required. Three hours per week.

COURSE IVb. German Conversation. The object of this course is to give those students who desire to acquire readiness in speaking German a special opportunity. The work is conducted on the laboratory plan and requires little preparation. Two hours per week, one hour credit. Course I and first semester of II are prerequisite to this course.

Students in the B. S. course are required to take two years of German in addition to the entrance requirement in that language.

Additional work in German will be offered if there is a sufficient demand.

French

COURSE I. Elementary. The work consists of a thorough study of the essentials of French grammar, drill in pronunciation, oral and written exercises. Texts: Fraser and Squair, *French Grammar*; François and Giroud, *Simple French*. Three hours per week.

COURSE II. A more detailed study of the grammar, prose composition; Halévy, *L'Abbé Constantine*; Mérimée, *Colomba*; Hugo, *Quatre-vingt-treize*. Three hours per week.

COURSE III. Studies in French literature. Dramas of Racine, Corneille, and Molière. Three hours per week.

English

PROFESSOR WEBB.

The courses of study offered in the English Department embrace the theory and practice of composition and the study of literature.

Work in composition is commenced in the Freshman class, and is required in connection with all courses in English. In the study of literature special attention is directed to the sympathetic and vital interpretation of the masterpieces of English literature. Careful study is made of the author's thoughts, of his method of expression, and of his relation to the literary movements of his time. The several courses taken together afford an opportunity of getting a comprehensive view of the origin and development of the English language and literature.

COURSE I. Literature and Composition. Select poems of Tennyson, Wordsworth, Milton, and Shakespeare; Palgrave's *Golden Treasury*; readings in English prose. Written exercises weekly; frequent conferences with the instructor. Three hours per week, throughout the year. Required of all Freshmen.

COURSE II. Advanced Rhetoric and Composition. Lectures, text-book, prose selections; special attention given to the English essayists. Three hours per week, throughout the year. Required of all Sophomores.

COURSE III. Shakespeare. A careful and critical interpretation of several representative plays of Shakespeare, with rapid reading and discussion of many others. Three hours per week, throughout the year. Open to students who have completed courses I and II.

COURSE IVa. Milton. *Paradise Lost* and selections from his prose works. Three hours per week, first semester.

COURSE Vb. American literature. Lectures, required readings, discussions, and essays. Three hours per week, second semester.

Courses IV and V are elective for Juniors and Seniors. They may be omitted at the discretion of the instructor.

COURSE VI. Nineteenth Century Literature. A study of the leading writers and movements of the century. Selections from Coleridge, Wordsworth, Shelley, Keats, Byron, Tennyson, and Browning are studied and discussed in class. Collateral reading from the leading prose writers will be assigned. Three hours per week, throughout the year. Intended primarily for Seniors and pre-supposes the completion of courses I, II, and III.

COURSE VII. Historical English. The development of the English language and literature in the Anglo-Saxon and the Middle English periods. The first semester is devoted to the study of Anglo-Saxon, the second to the works of Chaucer. Three hours per week, throughout the year. Elective for Seniors and graduate students.

History and Economics

ACTING-PROFESSOR CARSON.

COURSE Ia. History of Western Europe from the Barbarian invasions to the Protestant Revolution. The work is based on Robinson's *History of Western Europe, Readings in European History* (abridged edition), and Trenholme's *Syllabus*. Collateral reading is required on each lesson. Three hours per week, first semester. Required of all Freshmen.

COURSE Ib. History of Western Europe since the Protestant Revolution. A continuation of Course Ia. Three hours per week, second semester. Required of all Freshmen.

COURSE IIa. History of England to the Accession of the Stuarts. A general course, with emphasis on economic and constitutional history. Cheyney's *Short History of England* is used as an outline, but the main part of the work consists of lectures and extensive collateral readings. Three hours per week, first semester. Elective for students who have passed in Courses Ia and Ib.

COURSE IIb. History of England since the Accession of the Stuarts. Three hours per week, second semester. Elective on same conditions as Course IIa.

COURSE IIIa. History of Greece. Three hours per week, first semester. Elective for students who have passed in Courses Ia and Ib. (Not given in 1909-10.)

COURSE IIIb. History of Rome. Three hours per week, second semester. Elective for students who have passed in Courses Ia and Ib. (Not given in 1909-10.)

COURSE IVa. History of the United States from 1783 to 1829. This course is given by means of lectures, in connection with which students are required to read extensively and write topics upon assigned subjects. Three hours per week, first

semester. Intended for Juniors and Seniors. Should be preceded by Courses IIa and IIb.

COURSE IVb. History of the United States since 1829. A continuation of Course IVa. Three hours per week, second semester.

COURSE V. This course will deal with some period of European or American history in a way suited to the needs of advanced students. The field chosen will vary from year to year. Two hours per week, throughout the year. Intended for Seniors and Graduates. In 1909-10 the administrations of Thomas Jefferson were studied.

COURSE VI. Economics. A full year is given to the study of economics. An introductory survey of economic theory, based on Fetter's *Principles of Economics*, supplemented by lectures, collateral readings, and class reports, occupies about two-thirds of the year. The remainder of the year is devoted to the intensive study of some of the more important economic problems. Three hours per week, throughout the year. Intended for Seniors.

Mathematics

PROFESSOR BOND.

The main purpose in the study of mathematics should be to develop and strengthen the reasoning powers rather than the memory. There are many other studies that furnish ample opportunity for memory work. Therefore, in all the mathematical courses here offered, and in the method of teaching, this main purpose will be kept steadily in view, and as little mere memorizing of rules, propositions, and formulæ required as may be deemed necessary for the accomplishment of this purpose.

COURSE Ia. Advanced Algebra.

The work in algebra will include ratio, proportion, variation, the three progressions, undetermined coefficients, the general binomial theorem and its applications, the theory and computa-

tion of logarithms. Bowser's *College Algebra* is the text. Three hours per week.

COURSE Ib. Plane and Spherical Trigonometry. The work in trigonometry will involve the derivation of formulæ and their application to the solution of problems. The scope of the work is shown in Chauvenet's *Trigonometry*. Three hours per week. Course Ia and Course Ib are required of all Freshmen.

COURSE IIb. Plane Surveying and Leveling. Two hours per week. Elective for students who have had Course Ia and Course Ib.

COURSE III. Analytics. The nature and scope of the work are shown in Nichol's *Analytics*, which is the text used. Three hours per week throughout the year. This course is required for the B. S. degree. Elective for others who have had Course Ia and Course Ib.

COURSE IVa. Differential Calculus. Three hours per week. Open to students who have taken Course III.

COURSE IVb. Integral Calculus. Three hours per week. Open to students who have had Course IVa.

COURSE Va. Astronomy. Young's *Manual of Astronomy* is the text. Three hours per week. Open to students who have had Course III.

COURSE Vb. Mechanics. Three hours per week. Open to students who have had Course III.

COURSE VI. (1) Solid Analytical Geometry; (2) Differential Equations; (3) Philosophy of Mathematics; (4) Descriptive Geometry. Any one of these may be elected by graduates as a two-hour course running through the year.

COURSE VII. Additional graduate work will embrace some subject of higher mathematical theory or application according to the desire of the pupil. Two hours per week, throughout the year.

Chemistry and Physics

PROFESSOR SMITH.

These subjects treat of the great underlying facts, phenomena, and the laws of all nature. It is, therefore, important that all persons become more or less acquainted with them. The work is done by lecture, by lesson and by much practice in the laboratory. While theories and principles are considered of primary importance, the applications of them are also of intense interest; and in all of the following courses due attention is given to both principle and application. Each student is required to keep a careful record of his laboratory work. Two periods in the laboratory are the equivalent of one period in the class room.

Chemistry

COURSE I. General Chemistry, inorganic and organic, three hours per week throughout the year. Required of all candidates for a degree.

COURSE II. Analytic Chemistry. Qualitative analysis, three hours per week throughout the year. Elective for students who have had Course I.

COURSE III. Analytic Chemistry. Quantitative analysis, mainly laboratory work in gravimetric and volumetric processes. Three hours per week throughout the year. Elective for students who have had Courses I and II.

COURSE IVa. Organic Chemistry, three hours per week throughout first semester. Elective, Course I being pre-requisite.

COURSE Vb. Sanitary and Applied Chemistry. Three hours per week throughout second semester. Elective, Courses I, II, and IVa being pre-requisite.

Physics

COURSE I. General Physics, three hours per week throughout the year. Required of candidates for the B. S. degree, elective for others. Pre-requisites: Elementary Physics and Mathematics through Trigonometry.

COURSE IIa. Mechanics and Sound. Three hours per week throughout first semester. Elective for those who have had Course I.

COURSE IIb. Heat, Light, and Electricity. Three hours per week through second semester. Continuation of Course II with conditions the same.

COURSE IIIb. Meteorology, including a general study of the Atmosphere, of Climate, and of the methods of the U. S. Weather Service. Three times per week throughout the second semester. Elective for those who have had Chemistry I and Physics I.

Biology and Geology

PROFESSOR HOUSE.

It is intended in the following courses that the student shall obtain a general knowledge of the fundamental facts and laws of nature. Stress is laid upon the disciplinary value of careful and proper methods of observation and investigation, as well as the cultural value of becoming acquainted with the common forms of every-day life. The work is done in the laboratory, field, or lecture room as the conditions demand.

Zoölogy

COURSE Ia. Invertebrate Zoölogy. Type forms of the various groups of invertebrates are studied in the laboratory, aquaria, and field with reference to their structure, functions, life history, economic importance, and classification. Pratt's Invertebrate Zoölogy is used as a guide in the laboratory, sup-

plemented by text-book, lectures, and reference readings. Three hours per week, first semester.

COURSE II*b*. Vertebrate Zoölogy. Comparative anatomy of type forms and systematic classification of vertebrate specimens in the laboratory and field. Special attention will be given to the study of the birds, with reference to their identification, classification, and feeding and nesting habits. Laboratory, field, and lectures. Three hours per week, second semester. Courses Ia and II*b* required of all candidates for degrees.

COURSE III*a*. Embryology. Study of the early stages of the chick. Emphasis will be placed upon maturation and fertilization, the development of the germ layers, the early stages in the development of the organs of the body and the foetal membranes and attachment of the embryo. Directions will be given for preparing embryos and slides.

COURSE IV*b*. Heredity. The laws and theories of heredity and general biological problems. Text-book and reference reading.

Three hours per week, second semester.

COURSES III*a* and IV*b* are open to students who have completed Courses Ia and II*b*.

Botany

COURSE Ia. Plant Histology and Physiology. This includes the microscopic study of the cells and tissues of the plant, including root, stem, and leaves, and also the principles of nutrition, growth, and reproduction. Laboratory and lectures. Three hours per week, first semester.

COURSE II*b*. Cryptogamic and Systematic Botany. Type-forms of the various groups of cryptogams are studied in the laboratory, field, and aquaria, with reference to structure, life history, and classification. In addition, the analysis and classification of the flowering plants is taken up in the early spring. Three hours per week, second semester.

Mineralogy and Geology

The collections in the museum are admirably adapted to the work in this department. There are about five hundred species of minerals, many of which are duplicated several times. There are also complete sets of fossils and rocks representing type forms of all ages in the earth's development.

COURSE Ia. Mineralogy. This course includes the study of the laws of crystallography, illustrated by the various forms of natural crystals in the museum and a large collection of models, and laboratory work in the study and determination of minerals, ores, and rock-forming materials, embracing blow-pipe analysis and the usual chemical tests. First semester, four hours per week in the laboratory and one in the lecture room. Open to students who have passed in Chemistry I.

COURSE IIa. Dynamical and Structural Geology. Lecture room, laboratory, and field work. The first part embraces the study and description of agents concerned in the modification of land surfaces, such as weathering, erosion, sedimentation, and organic life. The second part deals with the nature and arrangement of the materials of the earth's crust, folding, metamorphism, earthquake phenomena, and mineral veins and ore deposits. Three hours per week, first semester.

COURSE IIIb. Historical Geology. This course involves the study of the history of the earth as shown by the succession and distribution of the rocks of its crust. Fossils are considered the best basis for making out a history of the earth, and the work of the class room is supplemented by a study of the large collection of specimens in the museum and also by collecting and studying the fossils of local formations. Three hours per week, second semester.

COURSES IIa and IIIb are required of all candidates for the B. S. degree, and may be elected by other students who have completed Courses Ia and IIb in Zoölogy.

CENTRAL ACADEMY

Purpose

In addition to the regular college courses, Central College maintains a high-grade Academy under the control of the President and Board of Curators. The primary aim of the Academy is to fit boys and young men for college. For this purpose it offers four-year courses preparatory to the Freshman class, but these courses are broadly educational and are admirably adapted to the needs of those who do not intend to take a college course.

Advantages

The Academy is situated on the Central College campus, and has as its home the building in which all the work of the College was formerly done, known then as Library Hall. The students are in constant touch and association with the regular student body of the College, use the same boarding-places, belong to the same literary societies, the same athletic association, and the same Young Men's Christian Association. They have access to the College library, and the work in science is done in the College laboratories, under the direction of the Academy instructor. The various religious and educational gatherings common to college communities give students advantages which are very rare and profitable.

Library

Academy students have full access to the regular College library and reading room, and in addition have a fairly good working library of reference books in the Academy building.

Prizes

The T. G. Mumpower Scholarship Prize of \$20 was endowed by the sons and daughters of Professor T. G. Mumpower as a memorial of their father. It is awarded for the best general scholarship in the Academy. Students who have part of their work in the College will not be eligible to this prize.

The Declamation Prize is offered by the St. Louis Methodist Preachers' Meeting, and is awarded for the best declamation delivered in the annual contest during commencement week.

W. L. Demaree, of Rushville, Ill., has endowed the Demaree Prize of thirty dollars in gold to be awarded annually to the student making the highest grades in scholarship in the first year of Central Academy. This prize is an incentive to generous rivalry on the part of the young men and boys who enter the beginning class of the Academy.

In the letter announcing the establishment of the prize, Brother Demaree says: "I would be thankful indeed for the privilege of helping some worthy young man in school. I was stirred by the grateful and noble tribute of Prof. Paul Horn, of Houston, Texas, to General Ewin who helped him through Central College."

Discipline

Fair, honest, firm government of a school is a necessity. All students are treated and trusted as gentlemen, and they must respond to this treatment.

Students of the Academy are under the authority of the Academy Principal and Faculty. The system of management differs from that of the College, and the wisdom of this course is apparent. Younger students cannot be given the degree of

freedom which can safely be granted to older and more mature young men. Oftentimes Academy students are mature young men, but if they are such, they are able to recognize the wisdom of a strong, firm oversight for those who are not able to use a larger freedom.

A few special regulations are indispensable, such as:

Students must observe study hours; must not keep or carry dangerous weapons; must not drink or keep intoxicating liquors; must not enter any places where such liquors are sold; must not use profane or obscene language; must not abuse school property; must not do anything unbecoming gentlemen.

The school is for students, those who are anxious to study and improve. While no regular recitations are conducted on Monday, the teachers reserve the right to summon students to the Academy on that day for violations of rules or neglect of duty during the preceding week. Anyone who so deports himself as to become undesirable will be discontinued.

Reports

Candid reports are sent to parents at the middle and the close of each semester, and the reports thus sent may be strictly relied upon. When students do their duty, parents should help them and us by encouraging them; and when they fail to do their full duty, we urge parents to help us by arousing the students to better efforts in every possible way.

To Parents

We urge that you allow your son to remain to the very last day of the session, as too frequently a year of good work is spoiled by withdrawing the student a few weeks or even days before the session is ended. After we have done our best for him for the greater part of the year, it is very discouraging to us, and generally to him, for that work to be broken up by a too early withdrawal.

We send you frequent reports of him and his work, and we shall give you frank notice of anything which we feel that you ought to know. While your boy is under our care, we are anxious about him, that he may develop properly and not disappoint you here, and we look to you for such assistance and co-operation as only the parent can give.

Fees

Tuition, each semester	\$20.00
Incidental fee, each semester	6.00
Laboratory fees, for students taking science, each semester.	1.00
Athletic Association fee, each semester.....	1.50

The incidental fee is required of every pupil, and must be paid at enrollment. No student will be allowed to recite until settlement has been made with the Registrar and an entrance card secured.

No deduction will be made in fees except for tuition in case of absence caused by protracted illness.

Students entering after the first month are charged from date of entrance.

ESTIMATE OF COST FOR YEAR IN THE ACADEMY

	Low.	Liberal.
Tuition and Fees.....	\$ 55.00	\$ 57.00
Boarding.....	120.00	160.00
Books, Stationery, etc ...	10.00	15.00
Laundry.....	10.00	15.00
Total.	\$195.00	\$247.00

Terms of Admission

It is very important for students to be present on the day of opening.

The applicant must be at least fourteen years old, and must

have completed the work of the eighth grade in some good public school, or its equivalent. Students coming from other schools and claiming credit for work done therein must present a certificate from the authorities of the school attended showing satisfactory records for class-work and good behavior.

Classification

On entering, students are placed by the Principal, in conference with the other teachers, in those classes for which they are prepared. Generally this is done without examination, but in some cases examinations are necessary. Students who are prepared for some of the studies of the College but not for all are allowed to take such College studies if they can do so without postponing uncompleted Academy work. Such students will be ranked as College students only when the amount of their work in the Academy does not exceed two units (see page 39).

Mature Students

The average age of our student body is about twenty years, and a number of our very best students are considerably older. The Academy affords special advantages to young men of maturer years who are really in earnest about securing an education. Although the regular course of study covers four years, arrangement will be made by which students who have not studied Latin, but who are more advanced in other subjects, may complete the course in three years; but to do this the student must maintain in all subjects a specified rank in scholarship.

Amount of Work

Every student is required to take the amount of work indicated by the regular courses of study, unless especially excused by the Faculty.

COURSE OF INSTRUCTION

This course of study is designed primarily to meet the requirements for admission to the Freshman class of Central College. Greek is required in the fourth year for admission to the classical course in the College; German, for the scientific course. Upon satisfactory completion of the academic course, the student is given a Certificate of Graduation attesting that fact.

In the following outline, Arabic numerals indicate number of recitations per week. The recitation period is one hour.

First Year

LATIN.—Beginner's Book.	4
MATHEMATICS.—Arithmetic (completed).	4
ENGLISH.—Grammar; compositions; classics.	
For study: <i>Lowell's Vision of Sir Launfal</i> ; <i>Irving's Sketch Book</i> ; <i>English Bible</i> .	
Parallel reading: <i>Macaulay's Lays of Ancient Rome</i> ; <i>Poe's Tales</i> ; <i>Hughes' Tom Brown's School Days</i> ; <i>Defoe's Robinson Crusoe</i> ; <i>Arabian Nights</i>	
HISTORY.—Ancient History.	4
	17

Second Year

LATIN.—Caesar (four books); composition and grammar.	4
MATHEMATICS.—Algebra.	4
ENGLISH.—Composition and rhetoric; classics.	
For study: <i>Scott's Lady of the Lake</i> ; <i>Longfellow's Courtship of Miles Standish</i> ; <i>Scott's Ivanhoe</i> ; <i>English Bible</i> .	
Parallel reading: <i>Cooper's Last of the Mohicans</i> ; <i>Hawthorne's House of the Seven Gables</i> ; <i>Dickens' Christmas Carol</i> ; <i>Dickens' Oliver Twist</i>	
HISTORY.—History of England.	4
	17

Third Year

LATIN.—Cicero (six orations); composition and grammar.....	4
MATHEMATICS.—Plane geometry.	4
ENGLISH.—Composition and rhetoric; classics.	
For study: <i>Milton's Minor Poems; Shakespeare's Merchant of Venice; Coleridge's Ancient Mariner; English Bible.</i>	
Parallel reading: <i>Tennyson's Idylls of the King; Goldsmith's Deserted Village; Lamb's Essays of Elia; Addison's Sir Roger De Coverley.</i>	5
HISTORY.—American History and Civics.....	4
	—
	17

Fourth Year

LATIN.—Vergil (four books); Ovid (two books); composition and grammar.	3
MATHEMATICS.—Solid geometry; advanced algebra.....	3
ENGLISH.—Study of the forms of prose and poetry; themes; classics.	
For study: <i>Shakespeare's Macbeth; Burke's Speech on Conciliation with America; Macaulay's Life of Johnson; English Bible.</i>	
Parallel reading: <i>Franklin's Autobiography; Eliot's Silas Marner; Dickens' Tale of Two Cities; Shakespeare's Julius Caesar; Browning (Selections)</i>	3
SCIENCE.—Elementary physics with laboratory work.....	3
GREEK.—Beginner's course; forms, constructions, and easy reading.	4
	or
GERMAN.—Elementary.	4
	—
	16

Warren, A. P.	'86	Zumbrunnen, Albert Clay. . . .	'07

This Register of the Graduates of Central College aims to present a list of the Alumni arranged by years of graduation, and to furnish information in regard to subsequent degrees conferred by Central College; degrees received from other institutions of learning; present address; past and present occupation; and public service performed. To the names of persons known to be deceased an asterisk (*) is prefixed, and, where the information is accessible, the date and place of death are added.

It is the desire of the authorities of Central College, as well as of the Alumni Association, to make this record as complete as possible. To this end, graduates are earnestly requested to send to the Registrar of Central College prompt announcement of changes in addresses and any other information which will serve to improve the list in future editions.

The register includes graduates in schools as well as holders of degrees; where the alumnus is a graduate in schools, the schools are given in italics.

1859

- *S. C. MAJOR, B. S. Died in Fayette, Mo., 1894.
Lawyer; State Senator and Member on Revision Committee State
Constitution, 1876.

Member S. W. Missouri Conference.
- JOHN M. MOORE, D. D.St. Louis, Mo.
Managing Editor *Nashville Advocate*; Member of St. Louis Conference.

CORRELATED SCHOOLS

CENTRAL ACADEMY

(Woodson Institute)

Richmond, Mo.

Under the Control of Central College.

REV. S. W. EMORY, *Principal*.

Woodson Institute was named in honor of the late T. D. Woodson, Esq., who contributed generously to its foundation. It is located on a commanding site in the eastern part of the city of Richmond. Richmond is a city of churches and is under local option. A law enforcement fund of more than one thousand dollars is pledged.

The building is lighted with electricity and heated by steam.

THE COURSE OF STUDY.—The Course of Study is arranged to correspond, in text books and the studies pursued, with that of Central College Academy. Graduates from Woodson Institute can enter the Freshman Class of Central College or of any other of the colleges composing the College Union of Missouri. By the beginning of the session of 1909-10, this institution will be on the list of accredited schools of the Missouri State University.

RELIGIOUS INFLUENCES.—The faculty is composed of Christian teachers and they will strive to train their pupils to be zealous members of some church. Daily services, consisting

of singing, Bible study and prayer, will be held in the Study Hall. All pupils will be required to take part in reading the Scriptures and a four years' course of Bible Study will be a part of the curriculum, but sectarian teaching will be excluded. Immoral students will not be allowed to remain in the school.

PHYSICAL CULTURE AND SPORTS.—Special attention will be given to this necessary part of a thorough preparation for a successful life, but match games with other schools will not be encouraged by the faculty.

MUSIC.—Two thoroughly prepared teachers will teach Instrumental and Vocal Music.

EXPRESSION.—Facility in telling is next in importance to knowing. Individual and General training will be given by competent teachers.

LITERARY SOCIETIES.—There are two Societies, each having an attractive hall. All pupils are required to be active members, and an hour from the schedule of recitations is set apart every week for this purpose. The students manage the Societies under the supervision of the teachers.

BOARDING DEPARTMENT.—Mrs. L. A. Emory is Matron and Manager of the boarding department. She will give careful and experienced attention to the welfare of those who are under her charge. There will be an abundant supply of well prepared food. Board will be \$3.50 per week, including furnished room, steam heat, and electric lights.

For catalogues and particulars address the Principal,

REV. S. W. EMORY, Richmond, Mo.

CENTRAL ACADEMY

(Centenary Academy)

Palmyra, Mo.

REV. JAMES A. LANIUS, *Principal.*

This institution prepares pupils thoroughly for admission to Central College and other colleges of like grade and at the same time furnishes a course of Literary, Musical, or Business training which is full, well-rounded, and complete in itself for those not proposing to attend college. With a beautiful campus of seven acres and two large brick buildings well heated and lighted and otherwise equipped for the various purposes, we are prepared to furnish the best of educational advantages under conditions as pleasant and agreeable as they can be made. In the Boarding Home for Young Ladies we are prepared to receive a limited number of small boys and give them such care and attention as their ages require.

Special Rate for Boarding Pupils

A flat rate of \$170 to cover cost of board, tuition, music (one kind), and use of piano for daily practice, or \$150 without music, will be made to pupils who enter for the entire year; but if from any cause such pupils should leave before the end of the year, they will be charged catalogue rates for the time they may have attended. These rates are very low, and are not duplicated by any young ladies' boarding-school in the state. The numbers are limited to twenty, and the low rates are made with the confident expectation that every place will be taken at an early day. Bills must be paid in advance or when called for.

For catalogue and further information, address

REV. JAS. A. LANIUS, *Principal.*
